Letter of recommendation for technology

Ontario Autism Program, core clinical services. Place on clinic letterhead.

Date: [date]

Child: [full name] Date of birth: [YYYY-MM-DD]
OAP client reference number: [number]

To whom it may concern,

I am a [Speech-Language Pathologist / other regulated profession], registered with [college name], registration number [number]. I deliver or oversee core clinical services for [child's name] under the Ontario Autism Program.

Assessment and need

[Child's name] was assessed on [date]. [Brief summary of communication needs in the clinician's own words.]

Recommendation

I recommend VoiceBloom AAC, a speech-generating software application for augmentative and alternative communication, for [child's name]. This recommendation is based on the assessment above and is reflected in the treatment plan dated [date], under the goal(s): [goal(s)].

How it will be used

[Settings, frequency, and who will support use. Note any programming, training or supervision you will provide.]

Cost and alternatives

Cost: $449 CAD plus applicable tax, or the amount shown on the attached receipt. One-time lifetime licence, no recurring fees.

I considered [alternatives, including loan or other funded options] and recommend this as the most economical option that meets the assessed need because [reason].

I have no financial interest in VoiceBloom Inc.
